Journal of Sports Science and Medicine (JSSM) is a nonprofit scientific electronic journal, publishing research and case studies, and review article in the fields of sports medicine and exercise sciences. JSSM is an open access journal which means that all content is freely available without charge to the user or his/her institution. Users are allowed to read, download, copy, print, search, or link to the full texts of the articles, or use them for any other lawful purpose, without asking prior permission from the publisher or the author. This is in accordance with the BOAI definition of open access. JSSM is published quarterly in March, June, September and December. JSSM also publishes editorials, letter to editors, abstracts of congress, panel, conference and symposium, and can function as an open discussion forum on significant issues in the sports medicine and exercise sciences. Articles written in English should be sent to JSSM. The journal content could be presented not only in print (pdf format) but also through the use of video, audio and interactive software since it is being published as an electronic journal. Authors, therefore, are encouraged to submit articles those use all appropriate media.

MISSION
JSSM is an electronic journal aims to present easy access to the scientific knowledge for sport-conscious individuals using contemporary methods. The purpose is to minimise the problems like the delays in publishing process of the articles or to acquire previous issues by drawing advantage from electronic medium. In this context, forming a discussion channel among the researchers would present a further opportunity to address any question or problem immediately. JSSM would also facilitate to display non-conventional materials like video clips, animations, colour photographs, etc.

SUBMISSION REQUIREMENTS
Manuscripts that do not comply with the following requirements and directives for process, style, and format will not enter the peer-review process. The JSSM does not accept descriptive studies or data reports and manuscript which has been published on preprint servers. Manuscripts are considered if they are submitted only to JSSM and therefore the submission signifies that all conditions declared by JSSM web page have been fulfilled and accepted. Each submission should include the transfer statement. It is understood that all authors listed on a manuscript have agreed to its submission. The signature of the corresponding author on the letter of receipt of the manuscript (by the editor), the author should notify the editor of the rejection of the manuscript. If the main author has not been informed of the rejection of the manuscript, the corresponding author has the responsibility to ensure that a patient's anonymity be carefully protected and to verify that any experimental investigation with human subjects reported in the manuscript was performed with informed consent and following all the guidelines for experimental investigation with human subjects required by the institution(s) with which all the authors are affiliated. Authors should mask patients' eyes and remove patients' names from figures unless they obtain written consent from the patients and submit written consent with the manuscript.

Conflicts of interest
Authors must state all possible conflicts of interest, including financial, consultant, institutional and other relationships that might lead to bias or a conflict of interest. If there is no conflict of interest, this should also be explicitly stated as none declared. All sources of funding should be acknowledged in the Acknowledgment section.

COPYRIGHT TRANSFER AND DUAL SUBMISSIONS
The JSSM must receive in writing the exclusive assignment of Copyright Transfer Statement from all authors at the time of manuscript submission. Manuscripts will not enter the peer-review process until the Copyright Transfer Statement assignment form is completed and sent to the Editorial Office. Manuscripts are considered for publication on the condition that they are contributed solely to JSSM. JSSM and, therefore, have not been and will not be published elsewhere, in part or in whole. Manuscripts containing data that have been posted to the Internet for public access will not be considered for publication.

PUBLISHING MODEL AND AUTHORS FEES
J Sports Sci & Med is published using the open access model. All content are available free of charge without restrictions from the journal's Website at: http://www.jssm.org. The submission of articles is free of charge. Authors are only requested to pay USD$1 2500 or Euro(€) 2350 or GBP (£) 1950 per article as royalty fee. Hereby, the authors share the copyright equally with JSSM and have the right to publish their articles in their University/Institute repository or in their personal websites; can use their articles totally or partially in their thesis, lectures, lecture notes, text books; can distribute their articles to third party without the permission of JSSM. This fee is requested after positive evaluation of a manuscript. The reviewer as a submitted author of the article has a 20% discount. Only bank transfers are accepted.

AUTHOR WITHDRAWAL POLICY
An author is free to withdraw an article at no charge – as long as it is withdrawn within a week of its original submission. After a week, there is a withdrawal fee. Once peer review is completed and/or the paper is accepted for publication, there are some costs of the process, which is about 100 USD$ for the publishing fee bonus of JSSM's reviewers. Therefore, the withdrawal fee is 40% of the publishing fee. For detail, you can contact with the editor-in-chief.

REVIEW AND PUBLISHING POLICY
It is understood that all authors listed on a manuscript have agreed to its submission. The signature of the corresponding author on the letter of submission signifies that all conditions declared by JSSM web page have been fulfilled and accepted. Each submission should include the Copyright Transfer Statement signed by all authors. JSSM use double blind review process. Upon receipt of a manuscript the editor will notify the corresponding author that the submission has been received. Received manuscripts are first examined by the JSSM editors and check about Plagiarism by using a commercial software program. Manuscripts with insufficient priority for publication and presence of Plagiarism are rejected promptly. Manuscripts not prepared in the advised style will be sent back to authors without scientific review. We encourage authors to suggest the names of potential reviewers, but we reserve the right of final selection. The manuscript will undergo a double blinded review process. Under this process the editor will forward (electronically) the manuscript to two independent reviewers. Normally the review process will take approximately 4 weeks. After the review process has been completed the main author will be notified via E-mail either of acceptance, revision or rejection of the manuscript. If the main author has not been informed of the results of the review process after 8 weeks from the date of confirmation of receipt of the manuscript (by the editor), the author should notify the editor-in-chief directly. If revision was recommended, this should be completed and
returned to the editor within 4 weeks, failure to return the revised manuscript within the allotted time span will lead to rejection of the manuscript. When a manuscript has been accepted for publication it will be forwarded to the editor-in-chief for final approval. The editor-in-chief will work with the main author to make necessary revisions in order for the manuscript to appear in the Journal of Sports Science and Medicine. The final proof of the manuscript will be sent to the main author as an E-mail attachment. If the main author requires any minor changes to the finished work, these should be submitted electronically to the editor-in-chief within one week.

The authors of manuscripts accepted for publication must transfer authors’ fee to the bank account of the publisher. Failure to payment will result in the manuscript not being accepted for publication. Manuscript accepted in the first quarter of the year will be published not later than the third quarter of the year.

PERMISSIONS
Materials taken from other sources must be accompanied by a written statement from both author and publisher giving permission to the Journal for reproduction. Obtain permission in writing from at least one author of papers still in press, unpublished data, and personal communications.

PREPARATION OF MANUSCRIPT

RESEARCH ARTICLE
Include the following sections in research articles without page space:
TITLE: Capital letters.
AUTHORS: Surname followed by initials and institution(s) where the study was conducted.
RUNNING HEAD: Maximum 5 words.
ABSTRACT: Include an abstract of not more than 300 words that includes objectives, methods, results and conclusions.
KEY WORDS: To assist in indexing the journal, list up to 6 key words (not first). Use terms from the Index Medicus medical subjects headings (MeSH) (http://www.nlm.nih.gov/mesh).
INTRODUCTION
METHODS
RESULTS
DISCUSSION
CONCLUSION
ACKNOWLEDGMENTS: Provide information sufficient to identify sources of support, technical assistance, and intellectual contributions not associated with authorship.
REFERENCES: Each citation in the text must be noted by surname and year in parentheses and must appear in the reference section as an alphabetic order. Example for citation in the text; a) for single author (Gür, 1999), b) for two authors (Gür and Akova, 2001), c) more than two authors (Gür et al., 2000).
Journal article:
Journal article, article not in English:

Chapter in edited book:
Thesis:
Thesis not in English:

Uns of Measurement:
Measurements of length, height, weight, and volume should be reported in metric units (meter, kilogram, or liter) or their decimal multiples. Temperatures should be given in degrees Celsius. Blood pressures should be given in millimeters of mercury. All hematomal and clinical chemistry measurements should be reported in the metric system in terms of the International System of Units (SI). Alternative or non-SI units should be added in parenthesis.

Abbreviations and Symbols:
Use only standard abbreviations. Avoid abbreviations in the title and abstract. The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

AUTHOR BIOGRAPHY: Please include a brief biography, approximately 50 words per author, for each author including (1) academic title/degrees, (2) institution affiliation, (3) research focus, (4) post and e-mail addresses and (5) photograph produced in JPEG format.

TABLES, FIGURES, VIDEO, ANIMATION ETC.: The location within the article where e.g. figures and tables appear should be indicated in the text. These materials (e.g. table, figure) should be submitted separately from the text document. Each item should be produced in Microsoft Office (Word, Excel, or PowerPoint), GIF or TIFF format. Electronically produced drawings, graphs, photographs, photomicrographs, animation and video are all acceptable. Limit still art files to 700 kilobytes of memory and use 96 dpi resolutions or consult with the editor-in-chief. Please have original photos or negatives available to submit on request of the editor-in-chief. Clearly identify digitally enhanced images as such and describe the method of enhancement. Include internal scale markers where appropriate. The author is responsible for ensuring that persons pictured in photographs have provided informed consent for the use of their picture. Please include the photographer’s name with each photograph so that he or she can be properly acknowledged. Submit each item separately and number sequentially as (main author) Figure 1, Figure 2, etc. and so on, for example, GürFigure1.jpg, GürTab1.doc, and GürVideo1.avi. Video clips should be less than 8 seconds in length; segments of greater length should be broken into a series of shorter clips. Make sure that each video clip is referred to within the body of the manuscript, together with an appropriate description of it.

Tables
Tables capture information concisely, and display it efficiently; they also provide information at any desired level of detail and precision. Including data in tables rather than text frequently makes it possible to reduce the length of the text.

Type each table with double spacing on a separate sheet of paper. Number tables consecutively in the order of their first citation in the text and supply a brief title for each. Do not use internal horizontal or vertical lines. Give each column a short or abbreviated heading. Authors should place explanatory matter in footnotes, not in the heading. Explain in footnotes all nonstandard abbreviations. For footnotes use the following symbols, in sequence:

Identify statistical measures of variations, such as standard deviation and standard error of the mean and give the variations in parentheses.

Be sure that each table is cited in the text.

If you use data from another published or unpublished source, obtain permission and acknowledge them fully.

REVIEW ARTICLE
The JSSM accept only systematic review or meta-analysis. Include the following sections in review articles without page space.
